OBJECTIVE

B.Tech 4thyr Computer Science student (2027) with hands-on full-stack web development experience in React, Node.js, and REST APIs. Built and deployed a real-time web application actively used by 300+ students daily. Skilled in responsive UI design, backend API development, cross-browser compatibility, and Git/GitHub collaboration.

EDUCATION

B.Tech – Computer Science & Engineering 2023 – 2027
P.R. Pote Patil College of Engineering and Management, Amravati
CGPA: 6.92 (Sem 1–5) | Expected Graduation: May 2027

TECHNICAL SKILLS

Languages: JavaScript, Python, Java
Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS
Backend: Node.js, REST APIs, Flask, JWT Authentication
Database: MySQL, PostgreSQL, MongoDB, Firebase Realtime DB (NoSQL)
Cloud & Deployment: AWS Fundamentals, Firebase Hosting

PROJECTS

Vahanas – Real-Time Campus Bus Tracker | Node.js · REST API · WebSocket · MySQL · React

- Built a full-stack responsive web app from scratch — Node.js REST API backend with a real-time React front-end, actively used by 300+ students across 5 campus routes.
- Integrated WebSocket for live GPS status updates with sub-second refresh; designed and managed the complete MySQL schema and all API endpoints.
- Ensured cross-browser and mobile compatibility; used Git/GitHub throughout for version control and feature branching.

AI-Powered Resume Screening Tool | Python · NLP · Flask · REST API · React

- Built a responsive React front-end connected to a Python/Flask REST API; HR users upload resumes and receive a ranked candidate list with match percentages, cutting manual screening time by ~60%.
- Tested on 200+ resumes across varied formats; handled complete front-end to back-end data flow, API integration, debugging, and cross-browser testing.
- Maintained clean, reusable code and managed collaborative development using Git and GitHub.

IoT Smart Health Monitoring & Emergency Alert System | ESP32 · Firebase · REST · React

- Developed a live React dashboard connected to Firebase Realtime DB; integrated REST API endpoints, monitored health data at 100ms intervals, achieved 99%+ GSM alert reliability.
- Designed full front-end to back-end data pipeline end-to-end; optimised rendering performance and ensured stable operation for 12+ hours per charge.

CERTIFICATIONS

- Claude Agent Skills & Building with Anthropic API** — Anthropic Mar 2026
- AWS Cloud Virtual Experience** — AWS / Forage Mar 2025
- NPTEL: Programming in Java** — IIT / NPTEL Jun 2025
- Python for Data Science, IoT Fundamentals, Intro to Python** — Infosys Springboard 2025
- Workshops: Generative AI, Power BI, GitHub** — MLSC, P.R. Pote Patil Mar 2026

LEADERSHIP & EXTRACURRICULARS

Treasurer, Microsoft Learn Student Chapter (MLSC) 2024 – Present
P.R. Pote Patil College of Engineering and Management, Amravati

- Managed event budgets and logistics for 6+ technical workshops; coordinated speakers and registrations for sessions of 80–120 students.
- Led coordination for workshops on Generative AI, Power BI, and GitHub — handled scheduling, venue booking, and team communication.
