## SUMMARY

Final Year AI & Data Science student who has built impactful real-world projects in AI/ML, GenAI, and Blockchain, while maintaining a strong academic record and a problem-solving mindset. My technical skills and ability to learn quickly make me a strong candidate for this role. I will contribute by developing reliable solutions, writing efficient code, and solving practical challenges that align with the organization's goals.

## PROFESSIONAL EXPERIENCE

### AI Automation & Business Intelligent Intern - Bharat Cares Solution 06/2026

- Developed an ML model achieving 94% accuracy and designed a RAG pipeline with a fine-tuned LLM for accurate, domain-specific responses.
- Collaborated within a 4-member cross-functional team, resolving data integration and retrieval challenges through iterative testing and model optimization, resulting in a robust, reliable end-to-end AI solution.

## EDUCATION

### B.Tech in Artificial Intelligence & Data Science 2023 – 06/2027 PRMIT&R Amravati

### Higher Secondary Certificate (HSC), Maharashtra State Board | 75.17% 2022 – 2023

### Secondary School Certificate (SSC), Maharashtra State Board | 96.60% 2020 – 2021

## SKILLS

**Programming Languages:** Python, C++, JavaScript

**Tools & Technologies:** Git, GitHub, Docker, Postman, Linux, AWS, MongoDB, RAG

## CERTIFICATES

- SheFi Cohort Season 17 — Blockchain & Solana Development
- NEC'24 Basic Track — Top 50, IIT Bombay
- NVIDIA: Fundamentals of Deep Learning
- IIT Bombay: Machine Learning Workshop
- IIT Bombay: LLM using Python

## PROJECTS

### Trustlens - AI Content Verification Platform 05/2026 – 07/2026

- Led a 3-member team to build an AI system that flags unreliable AI-generated and fraudulent content, achieving **93% precision** using RAG-based verification, LLM consistency checking, and anomaly detection.
- Designed and implemented the backend using **Node.js, PostgreSQL, and Polygon Blockchain**, enabling secure storage and tamper-evident, hash-anchored audit logging of every verification decision.
- Delivered** an explainable, auditable scoring system applied across two domains LLM hallucination detection and multilingual fake-review detection through iterative testing and backend-to-AI-pipeline integration, presented at multiple hackathons.

### Echobot AI — AI Voice Agent 08/2025 – 09/2025

- Built an end-to-end conversational AI voice agent, integrating AssemblyAI, Google Gemini, and Murf AI into a unified Speech-to-Text → LLM → Text-to-Speech pipeline for real-time voice interaction.
- Designed and optimized the speech-processing pipeline and conversational workflow logic, reducing voice-assistant response latency by 35% and improving overall conversation quality.

- Delivered a real-time, low-latency voice assistant capable of natural, responsive conversation, demonstrating end-to-end integration across multiple third-party AI APIs under real-time performance constraints.

## INTERESTS

---

## ROLES & RESPONSIBILITY

---

**AIML Domain Executive, GDG - Google developer Group on campus 10/2026**

Conducted hands on workshops and technical sessions on **Machine Learning, Computer Vision, and AI Literacy**, mentoring and training **300+ students** while promoting practical, industry-oriented learning.
